

Park

Count how many swings you do. Compare it with a friend or family member.

How many children are at the park? How many dogs can you see. What is the combined total?

What shapes can you see in the park?
How many triangles/cuboids/circles are there?

Ask your friends and family about their favourite piece of play equipment. Which is the most popular?

How many steps are there to climb to the top of the slide?

How many whole turns can you do on the roundabout?

Try not to get too dizzy!

How far are the swings from the slide? Estimate first and then count the footsteps. Compare this measurement with two other pieces of equipment.
